## TECHNICAL SKILLS

**Languages:** Python, SQL, C++, Java, JavaScript (React, Node.js), C, C#, HTML/CSS

**AI & Data:** Ollama, FastAPI, Local LLMs (Qwen2-VL), OpenCV, Pandas, NumPy, Jupyter Notebooks

**Frameworks & Tools:** Next.js 15, React, Node.js, n8n, Docker/Docker Compose, Coolify, Vercel, Prisma, PostgreSQL

**Concepts:** Agentic Workflows, OCR Vision Models, System Design, Data Privacy/Self-Hosting, REST APIs

## EDUCATION

**Toronto Metropolitan University**

*Honours BSc, Computer Science*

Toronto, ON

Expected Graduation Date: May 2029

- Intro to Python, Intro to Java, Computational Org, Data Structures, Web Security, DB Systems, Discrete Math

## PROFESSIONAL EXPERIENCE

**Lead Software Engineer & Co-Founder - [Website](#)**

Oakville, ON

Yusr Funeral Financial Aid

Jan 2024 - Present

- Designed and deployed a self-hosted, containerized **CRM** on a Hetzner VPS using **Docker Compose** and **Coolify**.
- Engineered a private **FastAPI** microservice running a quantized vision **LLM (Ollama with Qwen2-VL)** to automate ID document data extraction (OCR) without exposing member data to third-party APIs.
- Integrated **n8n** to orchestrate webhook-driven pipelines connecting **Next.js API** routes, Stripe billing events, **Resend** transactional emails, and Mailchimp.
- Built a secure **Next.js 15** front-end and **PostgreSQL/Prisma** backend with magic-link JWT authentication, handling complex user states and automated scheduled **cron** jobs.

**Full-Stack Software Developer Associate**

Remote

FluidAI Medical

May 2025 - August 2025

- Developed full-stack features using Python (Flask), React, and SQL, improving scalability of healthcare platforms by 80%.
- Built scalable **ETL pipelines** to synchronize data between model outputs and the frontend interface.
- Collaborated with cross-functional engineering teams in an **Agile** environment, applying version control (Git) and **CI/CD workflows** for rapid iteration.
- Implemented modular, object-oriented design patterns to improve code maintainability and software reliability across complex data structures.

**AI + Fintech Intern**

Remote

SCOOTY

May 2025 - August 2025

- Mastered **RAG**, **agentic workflows**, and **LLM** prompt-based automation to build financial tech solutions achieving a 98% accuracy in data retrieval.
- Developed **ML** and **DL models** focused on industry challenges, completing a rigorous technical and soft-skills curriculum.

## PROJECTS

**AI Stock Investment Strategist Agent**

[Github Repository](#)

- Developed a quantitative analysis tool using Python (Pandas, NumPy) to aggregate and interpret complex financial datasets.
- Implemented statistical algorithms to automate risk assessment and generate actionable investment insights.

**NASA FIRMS Fire Tracker Alert System**

[Github Repository](#)

- Developed an automated data ingestion pipeline processing live satellite feeds (JSON) to feed a real-time hazard detection system.
- Designed a geospatial proximity algorithm in Python to filter noise and identify high-priority threat zones with 96% accuracy

**Augmented Reality Quest**

[Website](#)

- Delivered seamless in-game experiences to 150+ concurrent users, implementing a secure NextAuth JWT authentication system, AWS S3, and a RESTful API managing 1,500+ queries/day for user tasks.

## CERTIFICATIONS

- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)
- Ontario Tech AI Driven Fintech Transformation Skills

Jan 2026
